

WHAT IS MEET AND CODE?

Meet and code is an initiative developed by Haus des Stiftens gGmbH and supported by TechSoup Europe country partners and volunteers like us.

The goal of Meet and Code is to introduce children and young people between the ages of 8 and 24 to the world of technology and coding. The events are designed to show young people how much fun coding can be and how it can help bring ideas to life. They should learn how technology works and how IT affects our daily lives. By exploring a broad range of technology and digital topics and creative coding, they will be encouraged to develop the digital skills they need in today's world.

What is African Impulse?

African Impulse e.V. is a registered internationally operating, non-profit, independent non-governmental organization (NGO), which campaigns for a fairer world in which the North and South cooperate, knowledge is exchanged, communities can be given the impulse to help themselves and children and the vulnerable can be empowered to shape their future themselves.

We believe Africa does not need help. What the people need, especially children and the youths is more education, and the society, more technological know-how.

End of workshop

DE

Dieser kostenlose Coding-Workshop eröffnet Kindern im Schulalter einen spielerischen Zugang zur Welt des Programmierens.

In diesem Workshop fangen wir mit einer ausführlichen Einführung in das Programmieren mit dem Calliope Mini an. Danach helfen wir den Teilnehmer*innen ihre eigenen Ideen zu verwirklichen.

Am Ende des Workshops haben die Teilnehmer*innen den sicheren Umgang mit dem Calliope Mini gelernt und erhalten eine Teilnahmeurkunde. .

Den Teilnehmer*innen stehen Imbiss und Getränke ganztägig zur Verfügung.

EN

This free workshop provides school children a playful gateway to the world of programming.

In this workshop, we start by introducing the participants into programming with the Calliope mini. We then help them to develop their own ideas.

At the end of the workshop, the participants must have learnt the basics of programming and shall be awarded a certificate of participation.

Snacks & soft drinks shall be available throughout the workshop.

Der **Calliope mini** ist ein Einplatinencomputer, der für Bildungszwecke entwickelt wurde und an deutschen Grundschulen eingesetzt werden soll. Ziel ist es, alle Schüler ab der dritten Klasse kostenlos mit einem Calliope mini auszustatten

Mit dem Calliope mini kann man spielerisch und kreativ die Welt der Computer kennenlernen.

Der kleine Minicomputer lässt sich einfach programmieren.

#meetandcode #codeEU

The **Calliope Mini** is a minicomputer designed for educational purposes and is used in some schools in Germany. The goal being that of providing for free it to children from the third.

With the Calliope Mini you can playfully and creatively get to know the world of computer programming.

It is very easy to program the minicomputer
